User Manual

1. Run software

**Open the software with IDEA, and the main run function is in the following path：**

SoftwareEngineeringG47->APP->src->main->com.study.journey->APP

Mark the "main" file as the source code root and the pom.xml as the maven project, then run the project from APP.java

2. Log in
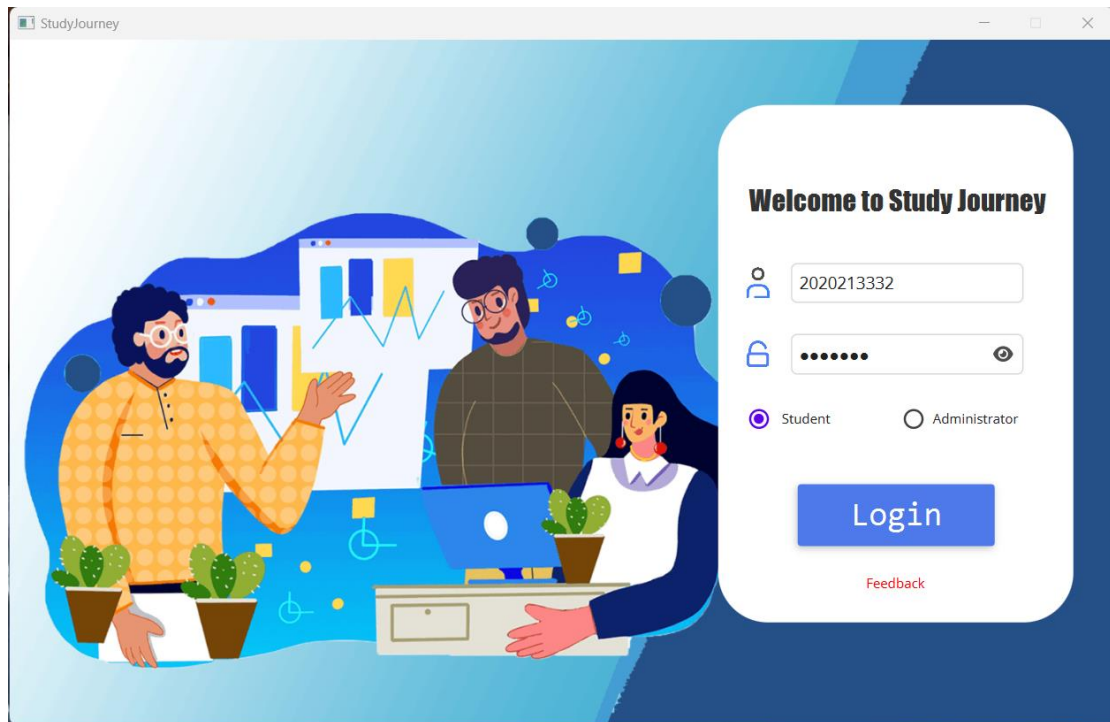

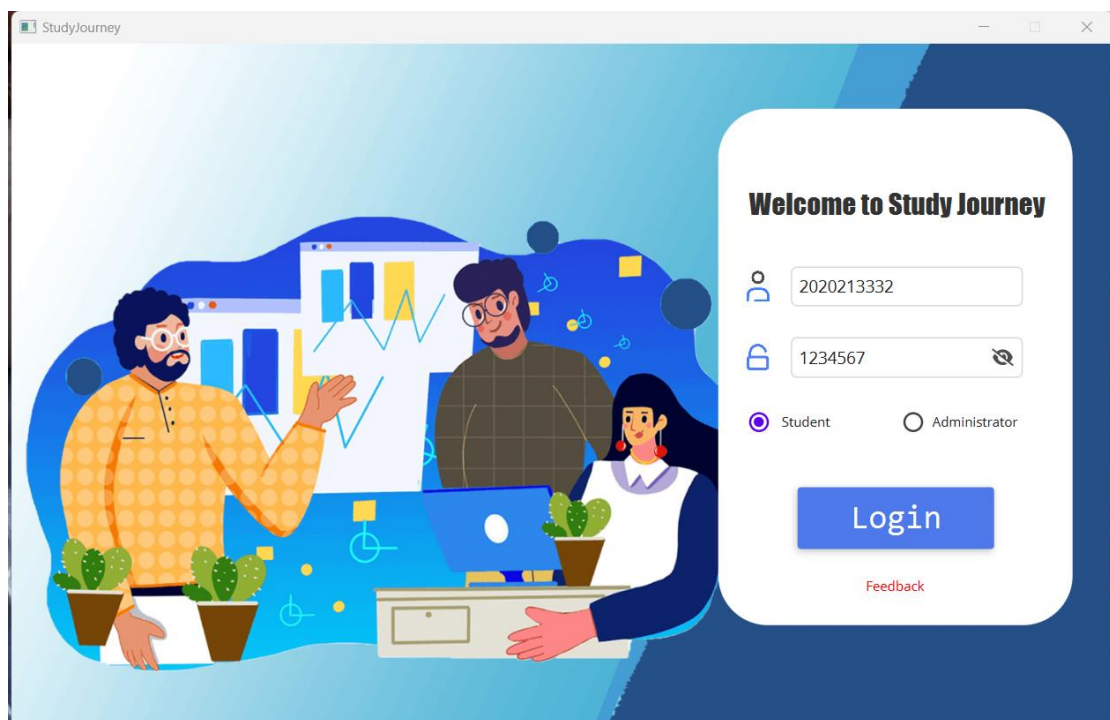

This is App's Login page:

There are two types of users: students and administrator.

First, if you are a new student, enter your ID and PIN allocated by your school and choose your identity as student. Of course, if you are manager, just choose Administrator.
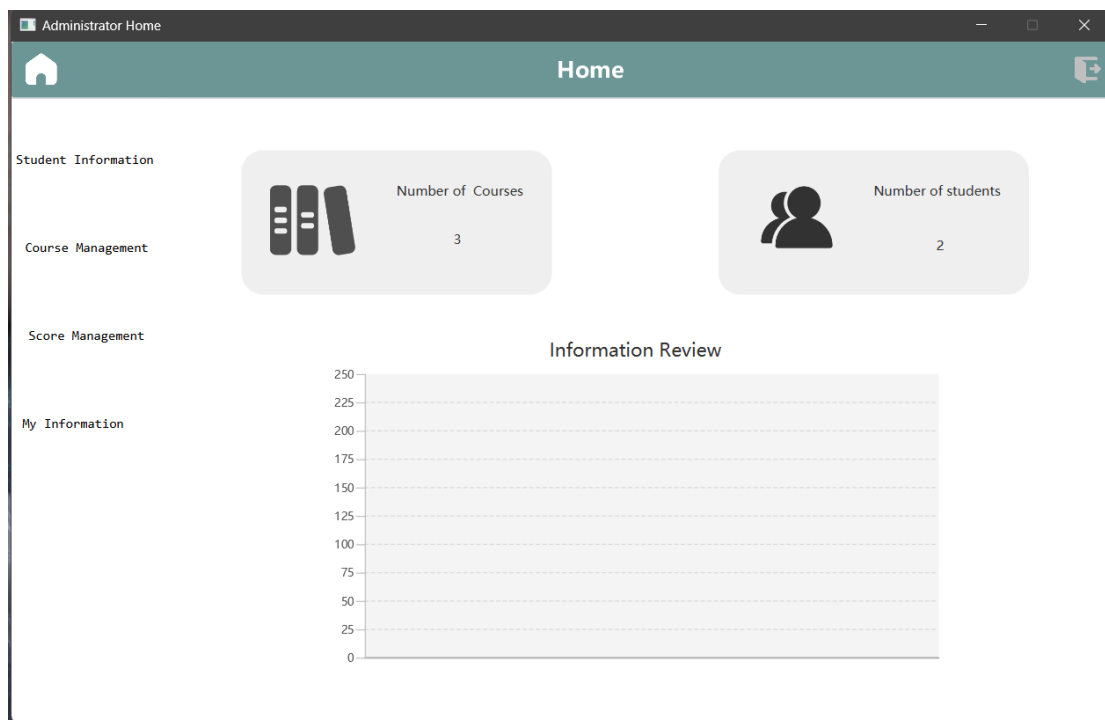

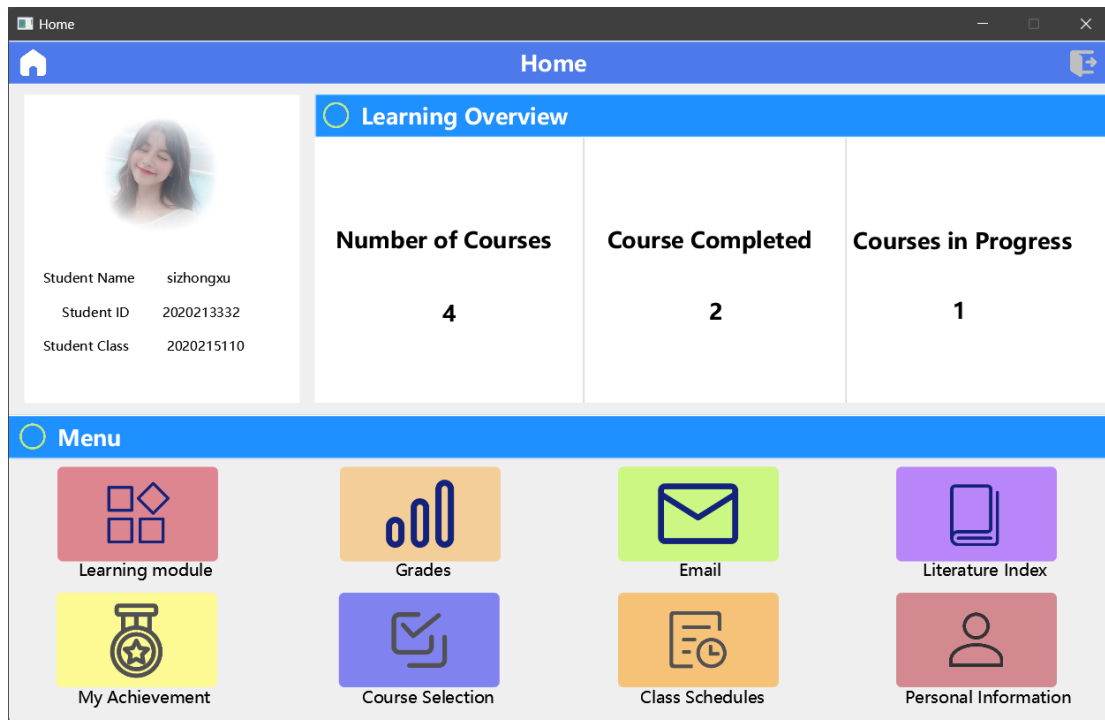

Just like the picture below:

You can click that "eye" in your password input box to check your input of it.

If you give correct information, after clicking login button, you come to your home page.

The student home page and administrator home page are shown below:

3. Application function

2.1 As student

a) Check your modules learned or under learning, click "Learning module"

b) Check your lectures' grade information, click "Grades".

c) Select target data, click the icon in the left-bottom of this page.

Name	Status	Credit	Grade
Art	1	3	100
Math	-1	4	95
Chinese	0	2	99
English	0
